Group25-2022-12-12-minutes

Meeting Taken place	Date	Time	Persons Present
The Core	08/12/2022	11:00- 12:00	Matthew, Eveleen, Kamile, Joseph, James
Tesco Café	11/12/2022	14:00-15:00	Matthew, Eveleen, Kamile, Joseph, James

Persons missing and reason for absence:

Dev was missing on the 08/12/2022 and on 11/12/2022. No explanation was
provided.

Review of what was discussed, decided and why on 08/12/2022 (1):

- The implementation of message of the day is to be done jointly by Mathew and Joseph.
- With regard to the Cell, that Mathew has been assigned to complete, the pains will be done based off of an x and y coordinate.
- The Logic class uses a one by two, within an array. This is as Java will be used to look over the height and width first. Joseph has completed the grid, using this way.
- The NPC's and Items all now have their graphical images attached to them, as created by Mathew.
- A positive of having all of our code be run within a package is that Mathew may easily be able to access the graphical images.
- It was clarified that the Smart Thief knows where it is on the board, but the other NPC's that Eveleen has created, would not need to know.
- Mathew has successfully added a text file along with an image file to everything.
- Joseph had created the class named "Misc", which stands for miscellaneous, which had the primary concern of the validation of methods.

Review of what was discussed, decided and why on 11/12/2022 (1):

- As a group we discussed our notes regarding the Contributions report. This was by further going into detail about how the implementation phase differed from our UML diagrams. For example, James found that the Cell class needed a lot of functions to be subdivided into other working functions.
- We looked over and discussed one another's Javadoc comments.
- We discussed what will happen during the Demo, Joseph will be demonstrating the game during the Demo.
- We conformed that every group member will be available for the demonstration of the group's game

Progress since the previous 04/12/2022 till 11/12/2022 meeting (2):

- **Kamile**- Has Restructured and finished the Item class so that it will just store information about itself, and nothing else. loot and collectables are done, as well as Javadoc commented.
- **Mathew**- Has finished the file manager and has uploaded this onto GitHub. Mathew has also worked with Joseph in order to complete the message of the day.
- **Eveleen**- Has finished the Flying Assassin and Floor Following Thief class. Eveleen has also created the explosion class, that will be used for the Bomb's explosion of direction.
- **Joseph**- Has Finished the Logic class, and uploaded it onto GitHub. Javadoc comments have been added, to Joseph's other classes. Joseph had created the class named "Misc", for miscellaneous.

- **James**- Has Finished implementing the methods that are within the Game class. James has also added getters and setters, along with Javadoc comments.
- **Dev**- No input was provided from Dev.

Actions to achieve before the 11/12/2022 meeting (3):

- **Kamile**- Complete Javadoc comments.
- **Mathew**- Check for any errors In the code as well as to look over other people's Javadoc comments.
- **Eveleen**- Check for any errors In the code as well as to look over other people's Javadoc comments.
- **Joseph**- Check for any errors In the code as well as to look over other people's Javadoc comments
- **James**- Complete Javadoc comments.
- **Dev** – Check for any errors in other individuals code, that has been uploaded onto GitHub.

Why members got the scores that they did:

- **Kamile**- Has finished the Item class and has uploaded it onto GitHub, along with Javadoc comments.
- **Mathew** – Has shown to have finished the creation of the file manager and Message of the day.
- **Eveleen**- Has finished the flying assassin and floor following thief class. Eveleen has also added relevant comments to these classes.
- **Joseph**- Has finished the board and Logic class. Joseph has furthermore added Javadoc comments to his work, and has provided a lot of oversight over other group members code. Joseph has also helped with the completion of Message of the day.
- **James**- Has completed the Cell class and has uploaded this onto GitHub. Furthermore, James has also added Javadoc comments to his code.
- *Dev*- No interaction has occurred.

Past meeting taken place	Date	Time	Topics of Discussion
Tuesday- 205 Lab room	06/12/2022	12:00-13:00	Kamile had shown the completed Item classes, The Thief class was finished
Wednesday- Zoom	07/12/2022	18:00	We had Looked over one another's code and comments
Thursday – The core	08/12/2022	11:00	This was discussed in the page above
Friday- Zoom	09/12/2022	18:00	Look over one another's code
Saturday	-	-	No meeting, instead we individually thought about the contribution report
Sunday – Tesco Café	11/12/2022	14:00	This was discussed in the page above
